

# INTERNSHIP PHP PROGRAMMER (M/F)

Founded in 2008, Jobzippers has specialized in recruiting services for the European university market. Our expertise lies in identifying trends and needs in the graduate recruiting market and creating a centralized network of university career services thus serving the needs of our clients. Our client base is composed of students & graduates, universities and companies. As representatives of these three groups are highly diverse, a large amount of flexibility and spontaneity is required for this job.

Jobzippers is a young and growing result-driven company. Our business requires effective, customer-based decision taking paired with the right amount of team spirit.

## Your skills

- Self-motivated and seeking to grow with us
- University student or graduate
- Flair for entrepreneurship
- Superior handling of time pressure and efficient, result-oriented operation
- Professional appearance towards colleagues, customers and partners
- 2+ years of practical experience realizing web projects based on PHP, MySQL and (x)HTML/CSS/JS
- Claim to solve problems elegantly as well as the ability to adhere to our coding guidelines and W3C standards including semantically correct markup
- Commitment to aesthetic, user-friendly template programming
- Experience in the Javascript framework jQuery, the Smarty template engine as well as in using and administrating linux-based web servers is welcome

## Your tasks

You will primarily enhance our development team by conceptualizing, programming, refining and maintaining parts of complex web applications. For this purpose, projects requiring the constant utilization of PHP and a template programming language will be assigned to you.

The internship can be conducted anywhere in Germany, preferably in Nuremberg. We are flexible on timing and duration but expect the minimum duration to be 3 months with a maximum of 6 months. After the internship you will receive an extensive assessment. Your reward will be as customary in the market. As we are growing fast it is not unlikely for an excellent intern to receive an offer to join the company.

## Interested?
